

AWARE 6.12.4

Summary of New and Enhanced Features

Participant Module:

- **New: Pre-ETS Case Type Parameters to Hide:** This version allows us to disable certain elements in the Pre-ETS case type, namely Eligibility and Plan. Moving forward you will no longer be able to enter an Eligibility Determination Date or a Plan Date. You will still be able to create drafts (we are awaiting an option to remove that ability in the Pre-ETS Case Type) though they will be read-only and will need a Field Support Ticket to be removed.

Eligibility Determination for ALEXANDER, TRENT

Employer Module:

New: Search by Street Name & Backdating: A new search field has been added to the Employer Module to search for an Employer by Street Name. Additionally, if a new Employer is created you will be able to backdate a service previous to the creation date, provided it follow the current backdating rules.

New: Post Plan Flags on Job Search Activities: Some services that are reported as job search activities on the RSA-911 Report were being done so prior to the consumer having an IPE. A new flag has been added to those reportable Job Search Activities that prevents these from being selected before the consumer has an approved IPE.

Miscellaneous:

- System improvements to loading times.
- Various fixes for errors.
- 911 Calculation Corrections.
- Edge should no longer leave a blank page after printing a letter. This still does happen if you print a report.
